Akuo Energy

Florida II Power Plant

| Florida – Uruguay

Wind Farm – 140 MW

Akuo Energy Uruguay **builds local projects**, which is part and parcel of the Group's DNA. It was during the development of the Florida I wind farm that the team decided to also allocate a budget envelope to **the renovation of Florida's "school 74"**, located on the project site. The operation cost 70,000 US dollars, entirely borne by the project (and its financiers). Every year, the Akuo Energy Uruguay teams visit the schoolchildren to talk with them and assist in their education and development!

| Gatinais I – France

Wind Farm – 24 MW

To complement this green energy facility, Akuo Energy has developed an **Agrienergie®** project in the form of a 1000m² permaculture business, by providing **financial support to young farmers**.

The land made available to the farmers is devoted to growing organic vegetables and raising livestock. As part of this commitment to **responsible agriculture**, Akuo Energy has already joined forces with Carrefour (French supermarket) to guarantee the sale of produce from the farm in Carrefour Bio stores in Ile-de-France, creating a **short supply chain** for the permaculture operation.

Strengthening farmers' collective irrigation network on the wind farm site

Burial of power lines for landscape reasons but especially to protect the lines of hazards (climate in particular)

3 inmates were given a job by Agriterra upon their release.

9 agroecology training modules.

27 inmates received agricultural training at the Bardzour site.

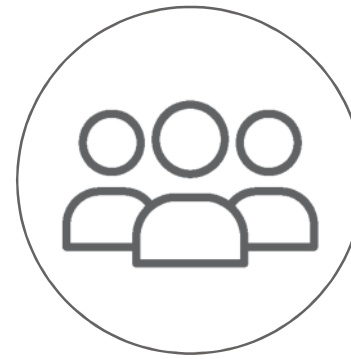

Ferme d'Akuo® is a community project that combines electricity generation from renewable sources and farm production along agroecological principles to recreate a natural ecosystem improving the soil on land previously used for industrial purposes (quarries, sandpits, wasteland, etc.).

Agriterra Group

Partner supporting the agricultural and nutritional transition right around the globe.

Agriterra Group present in five regions: France, Africa, Indian Ocean, Poland and the Balkans.

14 employees around the world.

THE CROWDLENDING PLATFORM

100%: success rate of our fundraising campaigns
4%: average annual interest rate on loans
54 days: average length of a fundraising campaign
€929: average amount invested per lender

A close-up photograph of a person's hands interacting with a weathered, outdoor faucet. The person's right hand is turned to the left, gripping the handle of the faucet, which is made of a dark, possibly brass or bronze, material that shows signs of age and rust. The left hand is positioned below the spout, cupping it to catch a stream of clear water as it flows. The background is a soft-focus green, suggesting a lush, outdoor environment. The lighting is natural, highlighting the textures of the skin and the metal.

Akuo Foundation

In line with Akuo Energy's values, the Group set up the Akuo Foundation in 2011 to extend its reach beyond the organization's frontiers. Under the aegis of the Luxembourg Foundation, the Akuo Foundation undertakes and supports sustainability projects in France and right around the world. The Foundation is active in four areas.

Under the Permaschool program with ACE Environnement, educational permaculture vegetable patches are set up in high schools to pass on ecofriendly tips to students and teach them about sustainability.

In Nosy-Faly, Madagascar, the Foundation is involved in a holistic project to develop the island, including a new bioclimatic school, the experimental farm and efforts to strengthen the environmental non-profit organization.
