

## PROJECT UPDATE

To the community of Granite Hills Wind Farm,

As most are aware, COVID-19 continues to have a significant global impact on most, if not all, industries. The pandemic has placed extreme financial pressures on international organisations, causing increased uncertainty for all businesses.

Akuo Energy is headquartered in France, where the pandemic has been particularly severe and as a result impacted global operations.

As a consequence of this increased business uncertainty, Akuo is currently not actively pursuing the Granite Hills Wind Farm project.

Notice of this has been communicated to the NSW Department of Planning Industry and Environment (DPIE).

Yours sincerely,

Granite Hills Wind Farm

## WELCOME

Our newsletters focus on updating you about the project, sharing any news, events or engagement activities in the community.

Visit [granitehillswindfarm.com](http://granitehillswindfarm.com) and register your interest to receive these updates about the project via email.

## ABOUT THE PROJECT

Granite Hills Wind Farm is a State Significant Development, situated in Steeple Flat, approximately 12 kilometres South East of Nimmitabel in New South Wales. When complete the project will comprise of up to 23-wind turbines, with approximately 4-6 megawatts capacity and a maximum tip height of 230 metres. The 132MW wind farm would generate enough clean energy for around 50,000 homes.

## STAY IN TOUCH
